## Sole Source Security Electronics and Detention Provider

ISI Security/MCS - Detention and Security Division was the origin company selected during the construction and design phase for the implementation of a Touchscreen control security system for the Euless Police Department. It has now been over 10 years since the initial implementation of the system for controlling and managing the Jail and Detention Division. As the Sole Source entity for the Security Electronic system in place, we remain to provide the level of confidentiality to the documents and design aspects of this facility. We are pleased to offer the Sole Source programming services, upgrades and support for your system. The products we offer, whether in programming, detention or electronic security are vital in maintaining and operating your detention center.

MCS has provided an integrated security system upgrade that will allow for components of the original design and build to work with the latest software and security components being used today without having to do a major overhaul or change out of the system. Our intent as the Sole Source provider of the Touchscreen control and Camera Surveillance system is to provide this update in a timely and efficient manner as to not cause any extended downtime or operational hardships.

Whether it is Security Electronics or Detention Hardware, MCS has proven to be the most efficient resource when trying to find the replacement components needed to maintain your facility. We hope to continue our support to you in the years to follow and encourage feedback.

If you have any questions please feel free to call at (210) 495-5245.

Sincerely,

**DARWIN KATAN**
