WHAT IS CERT?

In large scale disasters such as earthquakes, tornados or hurricanes emergency responders may not be immediately available to respond to every call for assistance.

The **Community Emergency Response Team (CERT)** Program is a nine week course that educates people about disaster preparedness for hazards that may impact their area and trains them in basic disaster response skills, such as fire safety, light search and rescue, team organization, and disaster medical operations.

Using the training learned in the classroom and during exercises, CERT members can assist others in their neighborhood or workplace following an event when professional responders are not immediately available to help. CERT members also are encouraged to support emergency response agencies by taking a more active role in emergency preparedness projects in their community.

The CERT Program is open to anyone who lives or works in the City of Euless and is at least 18 years old. Classes reflect a cross section of the community and are very diverse.

CERT Program Interest Card
