

CITY COUNCIL COMMUNICATION
November 28, 2017

SUBJECT: Engineering Design Contract with RW Harden and Associates, Inc. for the Design of the City of Euless Water Well Replacement Project

SUBMITTED BY: Hal Cranor, Director of Public Works and Engineering

REFERENCE NO:

ACTION REQUESTED:

Consider authorizing the City Manager to execute an Engineering Design Contract with RW Harden and Associates, Inc., a hydrogeology consulting and engineering firm, for the design of two water wells to replace the existing Fuller and Far North Wells.

ALTERNATIVES:

- Table the request
- Deny the request

SUMMARY OF SUBJECT:

The City of Euless issued a Request for Qualifications in February 2014 for a groundwater expert to assess the condition of the three wells operated by the City and selected RW Harden and Associates, Inc. for the work. In 2016, the same firm completed a Preliminary Well Design Report to determine the expected costs and procedure to replace one or more of the three wells. As a result of the study it was recommended to replace two of the three wells: one known as the "Fuller Well" located 120 West Fuller Road off of North Main Street, and the other known as the "Far North Well" located at 2400 North Main Street, just south of Westover Drive. This contract represents continued use of RW Harden and Associates, Inc. for the design and construction phases of the project. The scope of work for this portion of the project includes all below ground and associated work at the well facilities, the casing, screen, well head and pump equipment.

Staff recommends that Council authorize the City Manager to negotiate and execute a Engineering Design Contract with RW Harden and Associates, Inc.
